Not sure if you've had time to review these past comments by the Corps and Jacobs, most of which were incorporated into our formal comments submitted to the State on the initial Phase III AVX submitted to the State, so I've attached them here in case it helps you prepare for tomorrow's meeting.

Also attached are the comments we submitted to DEP. Let me know if you need the initial Phase III submission by AVX.

Finally, attached is the correspondence back and forth between AVX and EPA about the applicability of TSCA to the 21E cleanup (which you've likely seen in the past).
